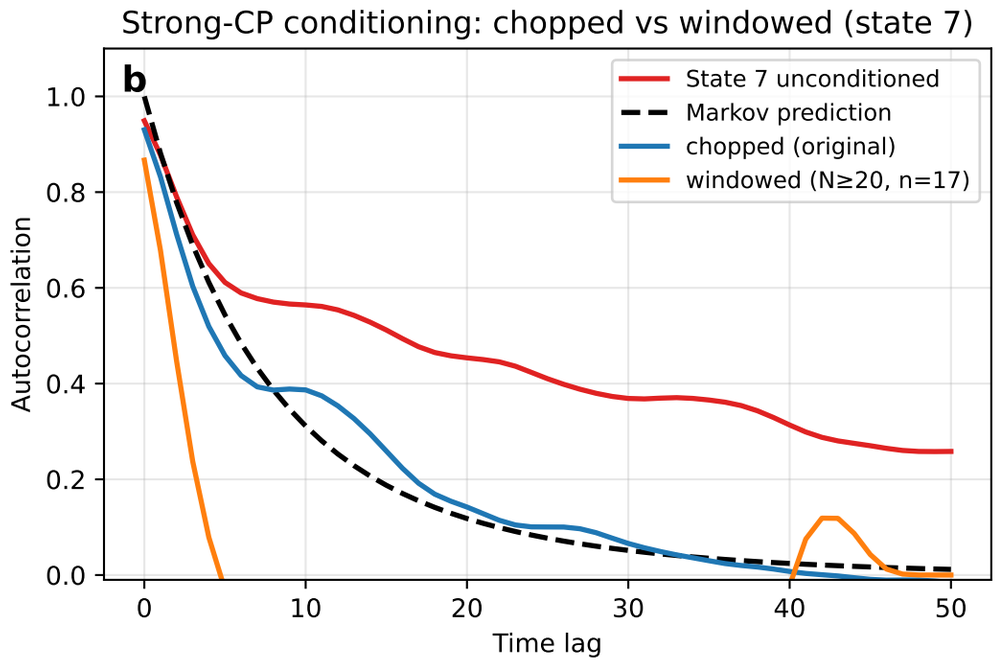
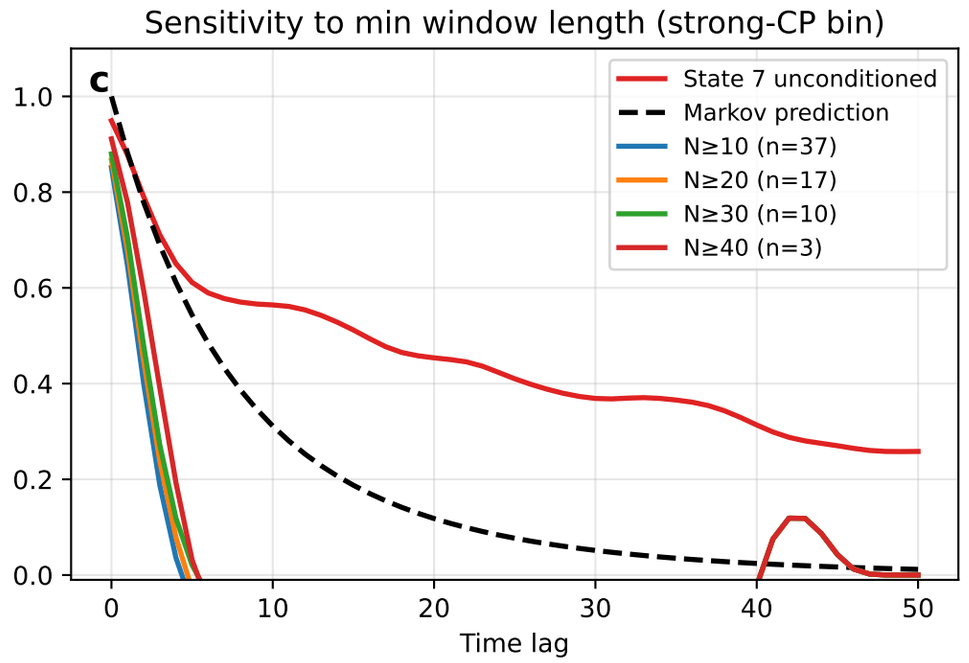
Example contiguous cold-pool window with state-6 indicator overlay
a
CP intensity
'strong CP' bin [1.42, 2.72)
continuous window (len=45 steps = 450 min)
CP intensity
State 7
Time index (each step = 10 min)



Strong-CP conditioning: chopped vs windowed (state 7)
b
State 7 unconditioned
Markov prediction
chopped (original)
windowed (N≥20, n=17)
Autocorrelation
Time lag



Sensitivity to min window length (strong-CP bin)
c
State 7 unconditioned
Markov prediction
N≥10 (n=37)
N≥20 (n=17)
N≥30 (n=10)
N≥40 (n=3)
Time lag
